

The Winter Vaccination Programme will start in September 2021.

You can find out if you're in a priority group eligible for a flu vaccine on [NHS inform](#)

We don't have all the details at the moment but we can tell you:

- You **will not** get your vaccine at your GP surgery
- You **will** get your vaccine at a clinic set up to vaccinate large numbers of people quickly
- You **will** have a pre-booked appointment or be invited to make a booking at a vaccination clinic.

Details on the vaccination clinics are being finalised and when supplies of vaccines become available we will update this page as soon as we have more information.

Please don't phone the practice as we don't have any additional information for the moment.

Please keep an eye on our website or [NHS inform](#)
